

Triad OnWall Bronze LCR

Triad's legendary sound and build quality is now available in an OnWall LCR designed for use with flat video displays. The OnWall Bronze LCR provides the same great performance as the InRoom, InWall, and InCeiling versions, giving you yet another application choice, particularly well suited to wall-mounted plasma and LCD televisions.

The stylish OnWall Bronze LCR features an extruded aluminum enclosure and Triad's famous Acoustimesh grill, and can be ordered in virtually any color, as well as black, white, and natural aluminum. There is also an option that allows you to order your LCRs in any length you specify, in 1/4" increments, to further match the video display. A unique bracket (included) allows for tilting and angling, as well as flush mounting to a wall.

When used with Triad Bronze Surrounds and any one of the four versions of the Bronze PowerSub, the OnWall Bronze LCR is the heart of a superb home theater system that looks as good as it sounds.
