

Speaker Cable high-end

SOMMER CABLE - QUADRA BLUE

A light at the end of the tunnel...

will appear in front of your eyes when you connect the new QUADRA BLUE to your reference-HiFi-system. Harmony not only in design, but also in sound is what the QUADRA BLUE will offer to you: an absolutely linear cable tempting you to play and experiment, as a bi-amping as well as bi-wiring connection or just as a simple input cable. We have stranded the super fine copper litz to utilize the advantages of the solid copper wires. This results in outstanding conductivity and excellent damping values, which are especially important for longer lengths. Even for excessive lengths the QUADRA BLUE works with almost no loss.

Allow yourself and your HiFi-system one of the best and most beautiful speaker cables we were able to develop over the last ten years.

THE ADVANTAGES:

- Extremely fast and linear transmission even for excessive lengths
- Very easy to work with
- Many possibilities for connection (bi-amping, bi-wiring, twin-axial input)

THE APPLICATION:

- High quality HiFi-speaker multicore for higher demands
- Connection of bi-amping and bi-wiring components

TECHNICAL DATA:

Construction	(4LIY4.0mm ²)Y
Jacket, diameter	PVC 15,0 mm
AWG	12
No. of conductors	4 x 4,0 mm ²
Copper strand per conductor	500 x 0,10 mm
Conductor insulation	S-PVC 3,5 mm
Temperature range	min. -20 °C
Temperature range	max. 70 °C
Fire load per m	0,55 kWh
Weight per 1 m	285 g
Color	■ aqua blue

ELECTRICAL DATA:

Cond. resistance per 1 km	< 4,5 Ohm
Insulat. resistance per 1 km	> 5 MOhm
